

Level Detecting Electrode for Molten Aluminum

● Use

This is used for a detection of melting surface of automatic ladling.

● Characteristics

Stopping position can be stabilized because the top edge keeps its sharpness.

● Specification

Item	Model
	LC-20
Length	60mm
Dia.	φ 20
Installation	Screw M10
Material	Carbon Ceramics Special Material

● Example of order code designation

Model

LC-20
