

Fluorine Contained Resin Tube

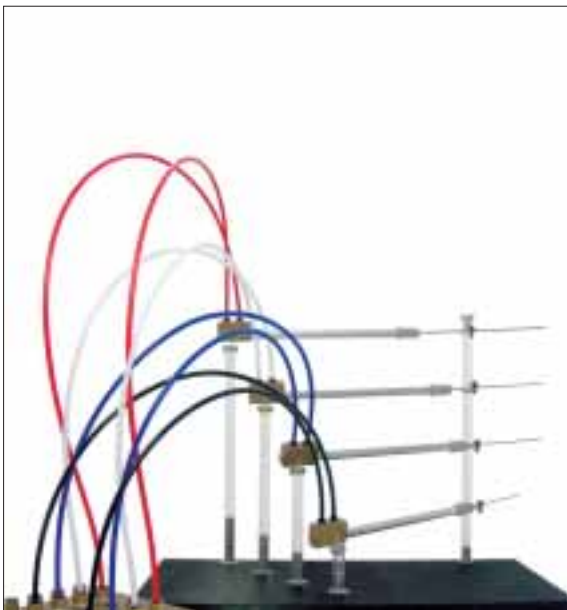

Our original new fluorine resin tube $\phi 6$ is now available in addition to $\phi 4$.

The type is CO-TB.

We recommend change from CO-TA, CO-TF and CO-TE to CO-TB.

Characteristics

- The price is low, because the tubes are our original products.
- Shipment is prompt because they are kept in stock.
- Severe dimensional tolerances are used to prevent leakage and falling-off.
- Minus side of tolerance for external dimension is 0.
- Colors are black, red, blue ($\phi 4$ only) and semi transparent for easy identification.
- Semi-transparent tubes enable viewing the fluid inside.
- Heat resistant temperature is as high as 250°C.
- Tubes do not melt against metal flash.

● Specification

Model	Outer Dia.	Inner Dia.	Bend Radius	Working Pressure	Hardness	Working Temperature	Unit	Color	Color Code
TB-042	φ 4	φ 2	15mm	2MPa	60~65 (Shore D)	250°C	20m	Black	-BK
								Red	-RD
								Blue	-BL
								Natural	-NU
TB-064	φ 6	φ 4	30mm	2MPa	60~65 (Shore D)	250°C	20m	Black	-BK
								Red	-RD
								Natural	-NU

● Example of order code designation

Model	Type	Size	Color	Unit
