

# Fluorine Contained Resin Tube

**Extensive  
lineup!**

**Newly released 20m/roll for the Yellow and Green colors with  $\phi 6$  and  $\phi 8$  outer diameter.**

## Common requests from Die-Casting customer,

- We'd like to separate it by colors not to have connection error.
- We'd like to identify important points that we need cautions with some colors of the Fluorine contained resin tube.
- We'd like some different color tubes which have high heat-resistance.

The Yellow and Green colors are popular in outer diameter  $\phi 4$ .

We have newly released new colors Yellow and Green for outer diameter  $\phi 6$  and  $\phi 8$ . Each color is available for Cool Tube too.

## Specifications

Model	Type	Outer Dia.	Inner Dia.	Size Code	Bend Radius	Maximum Working Pressure (at 20°C)	Hardness	Color	Color Code	Length Unit			Length Code
										20m/roll	100m/roll Bobbin	60m/roll Bobbin

\*The heat resistant temperature of the material(PTFE) is 250°C

\*Only the 100m(60m) type product is sold with a bobbin.

The bobbin is  $\phi 400$ mm in diameter, 100mm in width, and is made of corrugated board.

\*Please specify the length code with specifications.

 New items

## Characteristics

- This is our original product for Die-Casting customer.
- If you have any further questions when ordering, please do not hesitate to let us know.

## Example of Order Code Designation

Model - Type - Size Code - Color Code - Length Code - Quantity

CO - TB - 064 - GR - 20 - 2
